

# Occupational Heterogeneity in Exposure to Generative AI

By Ed Felten (Princeton), Manav Raj (University of Pennsylvania), Robert Seamans (New York University)<sup>1</sup>

**Abstract:** This article identifies and characterizes the occupations and populations most exposed to advances in generative AI, and documents how policy interventions may be necessary to help individuals adapt to the new demands of the labor market.

Recent dramatic increases in generative Artificial Intelligence (AI), including language modeling and image generation, has led to many questions about the effect of these technologies on the economy. We use a recently developed methodology to systematically assess which occupations are most exposed to advances in AI language modeling and image generation capabilities. We then characterize the profile of occupations that are more or less exposed based on characteristics of the occupation, suggesting that highly-educated, highly-paid, white-collar occupations may be most exposed to generative AI, and consider demographic variation in who will be most exposed to advances in generative AI. The range of occupations exposed to advances in generative AI, the rapidity with its spread, and the variation in which populations will be most exposed to such advances, suggest that government can play an important role in helping people adapt to how generative AI changes work.

## The Impact of AI on the Economy

Artificial Intelligence (AI), like other technologies in the past, will likely affect the economy in many ways, potentially boosting economic growth and changing the way people work and play (1, 2). The effect of AI on work will likely be multi-faceted. In some cases, AI may substitute for work previously done by humans, and in other cases, AI may complement work done by humans (e.g., 3). The effect on work will also vary across occupations and industries. The broad impact of AI tools (4), combined with the rapid pace of improvement in the underlying technology has generated public interest in understanding whether and how AI will reshape occupations. This has been particularly challenging because the capabilities of AI are advancing and evolving over time.

A prominent example of how AI capabilities continue to advance are the recent advances in generative AI, including AI-driven image generation and language modeling. Generative AI is AI that creates its own content (images or text) based on the patterns that it sees in large training data sets (in contrast to discriminative AI that utilizes data to make predictions and categorize content) (5). The public release of tools such as Dall-E 2, which generates digital images from natural language prompts, in September 2022 and ChatGPT, which generates text responses to natural language prompts, in November 2022 has drawn the attention of the general public to the progress in generative AI technologies.

The generative nature of these novel AI tools has raised concerns that such advances have changed the scope of what AI is capable of. This has generated concern regarding potential negative effects on employment, as in the *New York Post* article headlined “ChatGPT could make these jobs obsolete: ‘The wolf is at the door’” (6). At the same time, it has also stimulated excitement from businesses regarding the practical and commercial promise from these technologies. For example, Microsoft announced a \$13 billion partnership with Open AI and has linked generative AI technologies into its search engine and software (7). Moreover, the effects of generative AI technologies are likely to manifest relatively quickly, as consumer

---

<sup>1</sup> Corresponding author: Manav Raj (manavraj@wharton.upenn.edu). Authors listed alphabetically; all authors contributed equally. All errors are our own.

adoption of generative AI tools has been rapid. For example, ChatGPT is the fastest growing consumer application in history, having reportedly reached 100 million active users within two months of its public launch (8). In the midst of such rapid changes, it is critical to understand what kinds of occupations may face more or less exposure to advances in generative AI.

### **Occupational Exposure to Generative AI**

To study the effect of generative AI on occupations we use the methodology described in Felten et al. (2021) (9) to determine the occupations most exposed to advances in AI language modeling and AI image generation. The Felten et al. methodology links ten AI applications (e.g., image generation, language modeling, abstract strategy games, real-time video games) to 52 human abilities (e.g., oral comprehension, oral expression, inductive reasoning, arm-hand steadiness, etc.). The 52 abilities are then linked to 800+ occupations using the Occupational Information Network (O\*NET) database developed by the United States Department of Labor. For the purposes of this research, we focus on the applications of language modeling and image generation and use the method to construct exposure scores specific to each of these two applications of AI. More detail on the methodology is presented in the Supplementary Materials.

While the method standardizes the exposure scores such that they have a mean of zero and a standard deviation of one, we compare the unstandardized scores to explore differences across the two applications. Evaluating the raw scores suggests that the average occupational exposure to language modeling is higher than that to image generation (t-test of means is significant at  $p < 0.01$ ). This suggests that, perhaps unsurprisingly, the abilities most exposed to advances in language modeling (i.e., communication- and language-based abilities) are more commonplace than those most exposed to advances in image generation technologies (i.e., visual or spatial abilities). Further, we document far more variance in exposure to language modeling vs. image generation – the standard deviation of the raw occupational exposure is 14.6% of the sample mean for language modeling and 4.6% of the sample mean for image recognition.

Moving forward, we focus on the relative exposure of occupations within-application and consider the standardized occupational exposure score (set to equal a mean of zero and a standard deviation of one). The full list of occupations with exposure to language modeling and image recognition are presented in the Supplementary Materials. The occupations that are most exposed to advances in language modeling rely heavily on language- and communication-related abilities, such as telemarketers and a wide variety of education-related occupations. Many of the occupations most exposed to advances in image generation are occupations where spatial orientation is important, such as interior designers and architects. The differences across these measures highlights that advances in generative AI will potentially have very different effects depending on the domain to which generative AI is applied.<sup>2</sup>

We characterize the occupations most exposed to advances in generative AI by considering the relationship between the language modeling and image generation exposure scores and characteristics of the occupation. To investigate whether advances in generative AI are particularly likely to affect highly-educated white-collar workers (10), we evaluate the correlation between the constructed exposure measures and: a) the average occupational salary at the national-level as reported by the Bureau of Labor Statistics; b) the average required-level of education at the occupation-level as defined by the O\*NET database. Further, we investigate whether advances in generative AI are particularly likely to affect creative work (11), by evaluating the correlation between the constructed exposure measures and the relative presence of creative abilities within an occupation as defined by the O\*NET database. We present these relationships visually in Figure 1 using binned scatterplots.

The binned scatterplots suggest that there is a strong positive correlation between the two generative AI scores and median salaries, the required level of education, and the presence of creative abilities within an occupation. This is consistent with the idea that highly-skilled and highly-educated white-collar occupations

---

<sup>2</sup> While salient differences emerge, the image generation and language modeling occupational exposure scores are highly correlated with each other ( $r = 0.73$ ).

may be most likely to be exposed to the advances in generative AI technologies.<sup>3</sup> Literature has suggested that one possible explanation for widening economic inequality is related to skill-biased technological change – the theory that recent technological developments disproportionately increased highly educated workers’ productivity (12). We note that we remain agnostic to whether occupational exposure to generative AI is likely to result in automation vs. augmentation of occupations. However, given that these technologies appear to be particularly impactful for highly-educated and highly-paid workers, this finding has potential implications for inequality and which populations are most likely to benefit or be hurt from generative AI technologies.

Further, any heterogeneity in which occupations are most likely to be affected by generative AI technologies will also have implications for labor market outcomes across demographic groups, as the distribution of individuals across occupations is not equal across race or gender. To illustrate this point, we evaluate the correlation between the AI exposure scores and the relative representation of women and different racial and ethnic groups across occupations. For this analysis, we construct the relative representation of each population group using data from the U.S. Census Bureau’s American Community Survey (ACS) five year estimates from 2021, accessed through IPUMS (13). Through the ACS responses, we construct measures of representation at the occupation-level. We note that we are only able to construct such measures for 326 of the 764 occupations in our sample, so these results should be interpreted with caution.<sup>4</sup> However, they are illustrative of how different populations may have different exposure to generative AI. We present these relationships visually in Figure 2.

Figure 2 depicts a positive correlation between the percent of female, White, and Asian employment within an occupation and the two measures of exposure to generative AI. In contrast, we document a negative correlation between the percent of male, Black, and Hispanic employment within an occupation and the measures of exposure to generative AI.<sup>5</sup> These findings emphasize that the impact of generative AI is likely to differ across groups and highlight the importance of understanding when and under what conditions such technologies are likely to automate vs. augment for labor to understand their implications for inequality and to understand the heterogeneous impact of these technologies across the population.

Our findings complement several prior papers that have used a variety of techniques to assess how AI will affect the economy and jobs (e.g., 9, 14, 15), including a recent paper that predicts about 80% of the U.S. workforce could have at least 10% of their work tasks affected by the introduction of LLMs (4). We build on this literature by considering generative AI broadly and by exploring the characteristics and demographic composition of occupations most likely to be exposed to advances in generative AI.

## Policy Implications

The range of occupations exposed to advances in generative AI and the rapidity with which it seems to be adopted by firms suggest that government can play an important role to help minimize any disruptions associated with worker job losses and help maximize potential gains to the economy and society from adoption and use of these new technologies. This is particularly important since the effects of generative AI technologies are unlikely to be uniform across occupations or populations, and policy-makers have incentives to ensure that no one is left behind as markets adapt to these new tools.

Investing in programs that train the workforce in new technologies will benefit both firms and workers. Workers will learn the digital skills that are needed to take advantage of these new tools, which may allow workers to retain their existing jobs, even if the nature of the jobs themselves change as a result of the new

---

<sup>3</sup> In the Supplemental Materials, we further explore these relationships using regression analyses that control for occupational breadth and broad occupation category (*SM – Table 1*).

<sup>4</sup> While only 326 of the considered occupations can be mapped to the ACS data, for each occupation, we construct our statistics regarding occupation on samples of more than 500 individuals, allowing us to feel relatively confident about the measures of representation within the sample.

<sup>5</sup> In the Supplemental Materials, we further explore these relationships using regression analyses that control for occupational breadth and broad occupation category (*SM – Table 2*).

technology. In addition, a workforce trained in digital skills will benefit firms. At a minimum, the firms will not need to invest as much in training, but in addition the firms may benefit from a better prepared workforce that develops new and innovative ways to use the new technology.

In addition, policymakers should identify barriers to job mobility. Rapid changes to the economy, brought on by generative AI or any other emerging technology, means some sectors will likely grow quickly while others may shrink. For the sake of workers, their families, and economic growth, barriers to mobility should be removed. These barriers might include non-compete agreements, occupational licensing, and other regulations that limit entry into different occupations.

## Figure 1: Relationship between Occupational Characteristics and Exposure to Generative AI

Note: The figures plot the relationship between median salary, required education-level, and relative weight of creative abilities (x-axis) and occupational exposure to advances in language modeling or image generation (y-axis). Occupations are grouped into 20 equal-sized bins based on their x-axis value. Data on median salary at the occupation-level comes from 2021 Bureau of Labor Statistics' estimates. Data for required level of education is constructed as the weighted average of required education reported across an occupation. Data for the presence of creative abilities is constructed as the relative weight of the two creativity-oriented abilities (originality and category flexibility) amongst the portfolio of the 52 abilities O\*NET uses to characterize occupations. This analysis excludes any occupations for which we lack data on salary, required level of education, or creative abilities, respectively.

Panel A. Exposure to Generative AI and Median Salary.

Panel B. Exposure to Generative AI and Required Level of Education.

Panel C. Exposure to Generative AI and Presence of Creative Abilities.

## Figure 2: Relationship between Demographic Representation and Exposure to Generative AI

Note: The figures plot the relationship between demographic representation, calculated as the percent of occupational employment within a demographic group (x-axis) and occupational exposure to advances in language modeling or image generation (y-axis). Occupations are grouped into 20 equal-sized bins based on their x-axis value. Data on demographic representation comes from the 2021 ACS five-year estimates provided by IPUMS. This analysis includes 326 occupations for which we are able to construct values of demographic representation.

Panel A. Representation of Male Employees.

Panel B. Representation of Female Employees.

Panel C. Representation of White Employees.

Panel D. Representation of Black Employees.

Panel E. Representation of Asian Employees.

Panel F. Representation of Hispanic Employees.

# **SUPPLEMENTARY MATERIALS 1**

## **METHODOLOGY**

## 1. Methodology for “Which Occupations are Most Exposed to Advances in Generative AI”

The methodology used in “Which Occupations are Most Exposed to Advances in Generative AI” adapts a methodology used in Felten et al. 2021) (1). This supplemental material section describes the approach.

## 2. AI Occupational Exposure Methodology

According to Felten et al (2021), the AI Occupational Exposure (AIOE) is a measure of each occupation’s “exposure” to AI. The term “exposure” is used so as to be agnostic as to the effects of AI on the occupation, which could involve substitution or augmentation depending on various factors associated with the occupation itself.

The AIOE measure was constructed by linking 10 AI applications (abstract strategy games, real-time video games, image recognition, visual question answering, image generation, reading comprehension, language modeling, translation, speech recognition, and instrumental track recognition) to 52 human abilities (e.g., oral comprehension, oral expression, inductive reasoning, arm-hand steadiness, etc.) using a crowd-sourced matrix that indicates the level of relatedness between each AI application and human ability. Data on the AI applications come from the Electronic Frontier Foundation (EFF) which collects and maintains statistics about the progress of AI across multiple applications. Data on human abilities comes from the Occupational Information Network (O\*NET) database developed by the United States Department of Labor. O\*NET uses these 52 human abilities to describe the occupational makeup of each of 800+ occupations that it tracks. Each of 800+ occupations can be thought of as a weighted combination of the 52 human abilities. O\*NET uses two sets of weights: prevalence and importance. The Felten et al. (2021) measures are constructed using the O\*NET 24.2 version of the database, and we use that version of the database in the construction of our measures as well.

Once the 10 AI categories and 52 human abilities are linked through the matrix, the AIOE can then be calculated for each occupation. To do this, first we calculate an ability-level exposure as follows:

$$A_{ij} = \sum_{i=1}^{10} x_{ij} \quad (1)$$

Where  $i$  indexes the AI application and  $j$  indexes the occupational ability. The ability-level exposure,  $A$ , is calculated as the sum of the 10 application-ability relatedness scores,  $x$ , as constructed using the matrix of crowd-sourced survey data.

We then calculate the AIOE for each occupation  $k$  as follows:

$$AIOE_k = \frac{\sum_{j=1}^{52} A_{ij} \times L_{jk} \times I_{jk}}{\sum_{j=1}^{52} L_{jk} \times I_{jk}} \quad (2)$$

In this equation,  $i$  indexes the AI application,  $j$  indexes the occupational ability, and  $k$  indexes the occupation.  $A_{ij}$  represents the ability-level exposure score. We weight the ability-level AI exposure by the ability's prevalence ( $L_{jk}$ ) and importance ( $I_{jk}$ ) within each occupation as measured by O\*NET by multiplying the ability-level AI exposure by the prevalence and importance scores for that ability within each occupation, scaled so that they are equally weighted.

Felten et al. (2021) explain the construction of the AIOE scores in more detail, describe how they can be weighted at the industry level to construct an AI Industry Exposure score, or weighted at the geographic level to construct an AI Geographic Exposure score. They also provide results from a number of validation exercises and describe a number of ways in which the scores can be used by scholars and practitioners.<sup>1</sup>

## 3. Language Modeling AI Occupational Exposure

---

<sup>1</sup> The Felten et al (2021) paper is open access and available here:

<https://onlinelibrary.wiley.com/doi/full/10.1002/smj.3286> The data and code used to create the AIOE scores described in Felten et al (2021) is available on GitHub: <https://github.com/AIOE-Data/AIOE>

The original AIOE described in Felten et al (2021) explicitly weighted each of the AI applications the same. In order to update the AI Occupational Exposure score to account for advances in Language Modeling we modify equation (1) as follows.

$$A_{ij} = \sum_{i=1}^{10} \alpha_i x_{ij} \quad (3)$$

Where  $i$  indexes the AI application and  $j$  indexes the occupational ability. The ability-level exposure,  $A$ , is calculated as the weighted sum of the 10 application-ability relatedness scores,  $x$ , as constructed using the matrix of crowd-sourced survey data.  $\alpha_i$  is the weight placed on each application  $i$ . The weights used in Felten et al (2021) set  $\alpha_i$  equal to 1 for each application  $i$ .

Next, we set  $\alpha_i$  equal to 0 for every AI application except for language modeling, which retains a weight of 1. This then constructs an ability-level exposure measure that only “counts” the value of abilities that are related to language modeling. We then proceed to calculate the  $AIOE_k$  for each occupation  $k$  using this new “language modeling” weighted  $A_{ij}$ . The resulting  $AIOE_k$  therefore captures the extent to which each occupation is exposed to advances in language modeling due to AI. A complete list of the occupations and their resulting AIOE language modeling score are listed in the appendix and on GitHub.

The resulting scores are highly correlated with the original AIOE scores (correlation coefficient: 0.979). This can be seen in SM-Figure 1 which plots the original AIOE score and the new language modeling adjusted AIOE score for each occupation.

#### 4. Image Generation AI Occupational Exposure

For image generation, we follow a similar procedure. Namely, we modify equation (1) by setting  $\alpha_i$  equal to 0 for every AI application except for image generation, which retains a weight of 1. This then constructs an ability-level exposure measure that only “counts” the value of abilities that are related to image generation. We then proceed to calculate the  $AIOE_k$  for each occupation  $k$  using this new “image generation” weighted  $A_{ij}$ . The resulting  $AIOE_k$  therefore captures the extent to which each occupation is exposed to advances in image generation due to AI. A complete list of the occupations and their resulting AIOE image generation score are listed in supplementary materials and on GitHub.

The resulting scores are also highly correlated with the original AIOE scores (correlation coefficient: 0.853), but less so than the language modeling occupational exposure scores (the correlation between the image generation and language modeling occupational exposure scores is 0.734). In SM-Figure 2, we plot original AIOE score and the new image generation adjusted AIOE score for each occupation, and in SM-Figure 3 we plot the language modeling adjusted AIOE score and image generation AIOE score for each occupation.

#### 5. Relationship to Occupational Characteristics

We also investigate the relationship between the language modeling and image generation exposure scores and occupational characteristics. We obtain median occupational salary data from the Bureau of Labor Statistics (BLS), for 2021, the most recent year for which national level occupational wage data is available.<sup>2</sup> Due to changes in occupational definitions over time, we do not have the same set of occupations between the 2021 BLS data and our AIOE dataset. To address this difference, we match our AIOE dataset to the BLS wage dataset first on occupational codes and then on occupational titles (which allows us to match occupations where the code has changed but the occupation is the same). We have 708 occupations present in both datasets. We use the O\*NET data to construct our two other measures of occupational characteristics. We use O\*NET’s data on education, training, and experience at the occupation-level to construct the average required level of education for occupations in our sample. The O\*NET data presents the level of required education as a distribution across different levels of educational attainment at the occupation-level. We construct the required level of education at the occupation-level as

<sup>2</sup> <https://www.bls.gov/oes/>

the weighted average across this distribution. We use O\*NET's data on occupational abilities to measure the presence of creative abilities at the occupation-level. This measure is constructed as the relative weight of the two creativity-oriented abilities (originality and category flexibility) amongst the portfolio of the 52 abilities O\*NET uses to characterize occupations.

To investigate the relationship between salaries and exposure to language modeling and image generation, we present binned scatterplots documenting the relationship between the exposure scores and the measures of occupational characteristics. The binned scatterplots group occupations into 20 equal-sized bins by each occupational characteristic and then plots the average value for each of these bins to the average exposure score for that bin. These results are presented in the main text.

To further validate the relationship between the occupational exposure measures and these occupational characteristics, we consider regression analysis that evaluates the relationship between the exposure scores and the occupational characteristics controlling for the weighted breadth of abilities inherent in an occupation as well as the broad occupation category as defined by the BLS. This analysis is presented in SM-Table 1. We continue to find a strong positive relationship between the two exposure scores and each occupational characteristic (significant at  $p < 0.01$  for all considered models).

We likewise further explore the relationship between the occupation exposure measures the demographic representation within occupation using regression analyses. This analysis is presented in SM-Table 2 and only includes the 325 occupations for which we can construct measures of demographic representation at the occupation-level. We include the same control variables as in SM-Table 1. We find a significant positive correlation between exposure to language modeling and representation of female employees ( $p < 0.01$ ) and a significant and negative correlation between exposure to language modeling and representation of male, White, Black, and Hispanic employees ( $p < 0.01$  for both). However, the relationship between exposure to language modeling and the percent of Asian employees within an occupation is positive but no longer significant ( $p = 0.34$ ). Considering exposure to image recognition, the relationship with the representation of female employees is positive but nonsignificant and the relationship with the representation of male employees is negative but nonsignificant ( $p = 0.30$  for both), but we find a positive relationship between exposure to image recognition and the representation of Asian employees ( $p = 0.02$ ) and a negative relationship between exposure to image recognition and the representation of White, Black, and Hispanic employees ( $p < 0.01$  for both).

Notes: This table contains regression results displaying the relationship between each application-level measure of AI exposure and representation of demographic groups within the occupation. Regressions control for the weighted breadth of abilities within an occupation and include broad occupation category fixed effects. Robust standard errors are displayed in parentheses underneath coefficient estimates.

## **SUPPLEMENTARY MATERIALS 2**

### **FULL LIST OF OCCUPATIONS**

#### **SORTED BY LANGUAGE MODELING EXPOSURE SCORE**

<b>Rank</b>	<b>SOC Code</b>	<b>Occupation Title</b>	<b>Language Modeling AIOE</b>
1	41-9041	Telemarketers	1.926
2	25-1123	English Language and Literature Teachers, Postsecondary	1.857
3	25-1124	Foreign Language and Literature Teachers, Postsecondary	1.814
4	25-1125	History Teachers, Postsecondary	1.813
5	25-1112	Law Teachers, Postsecondary	1.802
6	25-1126	Philosophy and Religion Teachers, Postsecondary	1.800
7	25-1067	Sociology Teachers, Postsecondary	1.770
8	25-1065	Political Science Teachers, Postsecondary	1.770
9	25-1111	Criminal Justice and Law Enforcement Teachers, Postsecondary	1.754
10	19-3041	Sociologists	1.747
11	25-1113	Social Work Teachers, Postsecondary	1.739
12	25-1066	Psychology Teachers, Postsecondary	1.716
13	25-1122	Communications Teachers, Postsecondary	1.702
14	19-3094	Political Scientists	1.687
15	25-1062	Area, Ethnic, and Cultural Studies Teachers, Postsecondary	1.669
16	23-1022	Arbitrators, Mediators, and Conciliators	1.647
17	23-1023	Judges, Magistrate Judges, and Magistrates	1.646
18	25-1064	Geography Teachers, Postsecondary	1.629
19	25-1082	Library Science Teachers, Postsecondary	1.626
20	19-3031	Clinical, Counseling, and School Psychologists	1.626
21	25-1081	Education Teachers, Postsecondary	1.624
22	25-1011	Business Teachers, Postsecondary	1.618
23	25-1053	Environmental Science Teachers, Postsecondary	1.603
24	43-3061	Procurement Clerks	1.590
25	25-1043	Forestry and Conservation Science Teachers, Postsecondary	1.563
26	13-1071	Human Resources Specialists	1.557
27	13-1111	Management Analysts	1.548
28	23-1021	Administrative Law Judges, Adjudicators, and Hearing Officers	1.547
29	43-4041	Credit Authorizers, Checkers, and Clerks	1.546
30	11-9033	Education Administrators, Postsecondary	1.545
31	21-1014	Mental Health Counselors	1.537

32	25-1061	Anthropology and Archeology Teachers, Postsecondary	1.534
33	25-1051	Atmospheric, Earth, Marine, and Space Sciences Teachers, Postsecondary	1.522
34	27-3031	Public Relations Specialists	1.518
35	23-1012	Judicial Law Clerks	1.513
36	41-9091	Door-To-Door Sales Workers, News and Street Vendors, and Related Workers	1.511
37	13-1023	Purchasing Agents, Except Wholesale, Retail, and Farm Products	1.496
38	25-1042	Biological Science Teachers, Postsecondary	1.493
39	19-3093	Historians	1.491
40	25-3099	Teachers and Instructors, All Other	1.486
41	43-4161	Human Resources Assistants, Except Payroll and Timekeeping	1.481
42	29-9092	Genetic Counselors	1.478
43	13-2072	Loan Officers	1.477

45	27-3022	Reporters and Correspondents	1.471
46	21-2011	Clergy	1.470
47	25-1192	Home Economics Teachers, Postsecondary	1.468
48	11-3111	Compensation and Benefits Managers	1.467
49	25-1063	Economics Teachers, Postsecondary	1.462
50	23-1011	Lawyers	1.454
51	25-1052	Chemistry Teachers, Postsecondary	1.450
52	43-4111	Interviewers, Except Eligibility and Loan	1.449
53	25-3011	Adult Basic and Secondary Education and Literacy Teachers and Instructors	1.440
54	43-9081	Proofreaders and Copy Markers	1.436
55	13-1075	Labor Relations Specialists	1.431
56	25-1193	Recreation and Fitness Studies Teachers, Postsecondary	1.429
57	19-3032	Industrial-Organizational Psychologists	1.427
58	41-3021	Insurance Sales Agents	1.427
59	43-4061	Eligibility Interviewers, Government Programs	1.417
60	43-2021	Telephone Operators	1.412
61	25-1022	Mathematical Science Teachers, Postsecondary	1.407
62	13-1131	Fundraisers	1.405

63	13-2052	Personal Financial Advisors	1.396
64	11-3061	Purchasing Managers	1.393
65	25-1021	Computer Science Teachers, Postsecondary	1.390
66	23-2093	Title Examiners, Abstractors, and Searchers	1.384
67	11-2031	Public Relations and Fundraising Managers	1.383
68	25-1191	Graduate Teaching Assistants	1.376
69	29-1066	Psychiatrists	1.366
70	29-1031	Dietitians and Nutritionists	1.364
71	19-3092	Geographers	1.363
72	13-1141	Compensation, Benefits, and Job Analysis Specialists	1.362
73	11-3121	Human Resources Managers	1.359
74	13-2061	Financial Examiners	1.358
75	13-1161	Market Research Analysts and Marketing Specialists	1.356
76	13-2071	Credit Counselors	1.355
77	21-2021	Directors, Religious Activities and Education	1.355
78	27-3091	Interpreters and Translators	1.352
79	41-9021	Real Estate Brokers	1.348
80	29-1127	Speech-Language Pathologists	1.343
81	25-1032	Engineering Teachers, Postsecondary	1.337
82	11-3131	Training and Development Managers	1.337
83	43-4031	Court, Municipal, and License Clerks	1.336
84	25-2053	Special Education Teachers, Middle School	1.334
85	23-2011	Paralegals and Legal Assistants	1.333
86	19-3011	Economists	1.330
87	19-3039	Psychologists, All Other	1.330
88	25-9031	Instructional Coordinators	1.324
89	13-1151	Training and Development Specialists	1.323
90	27-3042	Technical Writers	1.317
91	11-9111	Medical and Health Services Managers	1.315
92	11-1011	Chief Executives	1.309
93	13-2031	Budget Analysts	1.300
94	43-6013	Medical Secretaries	1.298
95	11-3031	Financial Managers	1.295

96	11-2022	Sales Managers	1.294
97	25-2022	Middle School Teachers, Except Special and Career/Technical Education	1.284
98	19-1041	Epidemiologists	1.284
99	19-3022	Survey Researchers	1.279
100	41-3041	Travel Agents	1.278
101	43-4131	Loan Interviewers and Clerks	1.274
102	13-2051	Financial Analysts	1.273
103	43-3011	Bill and Account Collectors	1.270
104	13-2053	Insurance Underwriters	1.262
105	41-3031	Securities, Commodities, and Financial Services Sales Agents	1.260
106	19-2021	Atmospheric and Space Scientists	1.259
107	41-1012	First-Line Supervisors of Non-Retail Sales Workers	1.259
108	43-9041	Insurance Claims and Policy Processing Clerks	1.257
109	43-5011	Cargo and Freight Agents	1.255
110	43-6014	Secretaries and Administrative Assistants, Except Legal, Medical, and Executive	1.254
111	13-2081	Tax Examiners and Collectors, and Revenue Agents	1.253
112	21-1023	Mental Health and Substance Abuse Social Workers	1.253
113	13-2099	Financial Specialists, All Other	1.253
114	25-2031	Secondary School Teachers, Except Special and Career/Technical Education	1.249
115	13-1011	Agents and Business Managers of Artists, Performers, and Athletes	1.248
116	25-1031	Architecture Teachers, Postsecondary	1.246
117	43-2011	Switchboard Operators, Including Answering Service	1.244
118	15-2041	Statisticians	1.243
119	41-3099	Sales Representatives, Services, All Other	1.242
120	11-9121	Natural Sciences Managers	1.241
121	25-1054	Physics Teachers, Postsecondary	1.240
122	15-2031	Operations Research Analysts	1.234
123	27-3021	Broadcast News Analysts	1.230
124	25-1071	Health Specialties Teachers, Postsecondary	1.226

607	51-3021	Butchers and Meat Cutters	-0.977
608	51-4041	Machinists	-0.978
609	49-2092	Electric Motor, Power Tool, and Related Repairers	-0.980
610	49-9081	Wind Turbine Service Technicians	-0.984
611	49-9094	Locksmiths and Safe Repairers	-0.991
612	47-5021	Earth Drillers, Except Oil and Gas	-0.999
613	45-4011	Forest and Conservation Workers	-1.000
614	51-6041	Shoe and Leather Workers and Repairers	-1.007
615	43-5053	Postal Service Mail Sorters, Processors, and Processing Machine Operators	-1.007
616	51-9111	Packaging and Filling Machine Operators and Tenders	-1.011
617	53-7063	Machine Feeders and Offbearers	-1.013
618	49-9043	Maintenance Workers, Machinery	-1.015
619	51-6051	Sewers, Hand	-1.019
620	53-4013	Rail Yard Engineers, Dinkey Operators, and Hostlers	-1.021
621	51-3022	Meat, Poultry, and Fish Cutters and Trimmers	-1.026
622	43-5041	Meter Readers, Utilities	-1.027
623	37-2012	Maids and Housekeeping Cleaners	-1.031
624	51-9193	Cooling and Freezing Equipment Operators and Tenders	-1.031
625	49-3023	Automotive Service Technicians and Mechanics	-1.031
626	45-2041	Graders and Sorters, Agricultural Products	-1.032
627	47-2231	Solar Photovoltaic Installers	-1.037
628	53-6021	Parking Lot Attendants	-1.038
629	51-2031	Engine and Other Machine Assemblers	-1.045
630	51-4122	Welding, Soldering, and Brazing Machine Setters, Operators, and Tenders	-1.048
631	51-9012	Separating, Filtering, Clarifying, Precipitating, and Still Machine Setters, Operators, and Tenders	-1.048
632	47-2042	Floor Layers, Except Carpet, Wood, and Hard Tiles	-1.049
633	53-3021	Bus Drivers, Transit and Intercity	-1.050
634	51-6042	Shoe Machine Operators and Tenders	-1.052
635	49-9052	Telecommunications Line Installers and Repairers	-1.054
636	49-3031	Bus and Truck Mechanics and Diesel Engine Specialists	-1.058

637	47-5013	Service Unit Operators, Oil, Gas, and Mining	-1.068
638	49-9071	Maintenance and Repair Workers, General	-1.070
639	53-4012	Locomotive Firers	-1.073
640	51-2041	Structural Metal Fabricators and Fitters	-1.078
641	47-2132	Insulation Workers, Mechanical	-1.080
642	49-9092	Commercial Divers	-1.082
643	31-1015	Orderlies	-1.088
644	45-2093	Farmworkers, Farm, Ranch, and Aquacultural Animals	-1.089
645	37-2011	Janitors and Cleaners, Except Maids and Housekeeping Cleaners	-1.093
646	51-4194	Tool Grinders, Filers, and Sharpeners	-1.097
647	53-7073	Wellhead Pumpers	-1.099
648	51-4072	Molding, Coremaking, and Casting Machine Setters, Operators, and Tenders, Metal and Plastic	-1.108
649	53-6031	Automotive and Watercraft Service Attendants	-1.108
650	51-6062	Textile Cutting Machine Setters, Operators, and Tenders	-1.116
651	49-9051	Electrical Power-Line Installers and Repairers	-1.119
652	47-2152	Plumbers, Pipefitters, and Steamfitters	-1.120
653	47-2011	Boilermakers	-1.122
654	51-9192	Cleaning, Washing, and Metal Pickling Equipment Operators and Tenders	-1.124
655	51-4034	Lathe and Turning Machine Tool Setters, Operators, and Tenders, Metal and Plastic	-1.126
656	53-7041	Hoist and Winch Operators	-1.127
657	51-9021	Crushing, Grinding, and Polishing Machine Setters, Operators, and Tenders	-1.136
658	51-9041	Extruding, Forming, Pressing, and Compacting Machine Setters, Operators, and Tenders	-1.138
659	51-4052	Pourers and Casters, Metal	-1.143
660	49-9097	Signal and Track Switch Repairers	-1.148
661	51-4031	Cutting, Punching, and Press Machine Setters, Operators, and Tenders, Metal and Plastic	-1.150
662	51-6063	Textile Knitting and Weaving Machine Setters, Operators, and Tenders	-1.156
663	51-4191	Heat Treating Equipment Setters, Operators, and Tenders, Metal and Plastic	-1.171

664	47-2073	Operating Engineers and Other Construction Equipment Operators	-1.174
665	53-5022	Motorboat Operators	-1.177
666	47-2151	Pipelayers	-1.181
667	51-4023	Rolling Machine Setters, Operators, and Tenders, Metal and Plastic	-1.186
668	53-7064	Packers and Packagers, Hand	-1.193
669	51-4033	Grinding, Lapping, Polishing, and Buffing Machine Tool Setters, Operators, and Tenders, Metal and Plastic	-1.194
670	47-2044	Tile and Marble Setters	-1.196
671	51-9032	Cutting and Slicing Machine Setters, Operators, and Tenders	-1.199
672	49-3021	Automotive Body and Related Repairers	-1.199
673	53-3033	Light Truck or Delivery Services Drivers	-1.200
674	51-7042	Woodworking Machine Setters, Operators, and Tenders, Except Sawing	-1.204
675	51-7032	Patternmakers, Wood	-1.208
676	49-9045	Refractory Materials Repairers, Except Brickmasons	-1.209
677	49-9041	Industrial Machinery Mechanics	-1.217
678	51-9022	Grinding and Polishing Workers, Hand	-1.220
679	49-3022	Automotive Glass Installers and Repairers	-1.235
680	51-7021	Furniture Finishers	-1.238
681	49-3041	Farm Equipment Mechanics and Service Technicians	-1.239
682	45-2091	Agricultural Equipment Operators	-1.240
683	51-9195	Molders, Shapers, and Casters, Except Metal and Plastic	-1.241
684	47-2211	Sheet Metal Workers	-1.245
685	47-2031	Carpenters	-1.245
686	53-7031	Dredge Operators	-1.256
687	39-9031	Fitness Trainers and Aerobics Instructors	-1.257
688	49-3042	Mobile Heavy Equipment Mechanics, Except Engines	-1.259
689	47-4071	Septic Tank Servicers and Sewer Pipe Cleaners	-1.260
690	53-7081	Refuse and Recyclable Material Collectors	-1.263
691	51-7041	Sawing Machine Setters, Operators, and Tenders, Wood	-1.265
692	47-2121	Glaziers	-1.267
693	53-5011	Sailors and Marine Oilers	-1.269
694	51-6031	Sewing Machine Operators	-1.273

695	51-2091	Fiberglass Laminators and Fabricators	-1.277
696	49-9096	Riggers	-1.278
697	51-9121	Coating, Painting, and Spraying Machine Setters, Operators, and Tenders	-1.279
698	47-4051	Highway Maintenance Workers	-1.282
699	49-9011	Mechanical Door Repairers	-1.282
700	47-5042	Mine Cutting and Channeling Machine Operators	-1.283
701	49-9044	Millwrights	-1.284
702	51-9191	Adhesive Bonding Machine Operators and Tenders	-1.285
703	33-2011	Firefighters	-1.287
704	27-2021	Athletes and Sports Competitors	-1.290
705	51-4121	Welders, Cutters, Solderers, and Brazers	-1.298
706	47-2071	Paving, Surfacing, and Tamping Equipment Operators	-1.303
707	51-4051	Metal-Refining Furnace Operators and Tenders	-1.304
708	53-4021	Railroad Brake, Signal, and Switch Operators	-1.306
709	49-9098	Helpers--Installation, Maintenance, and Repair Workers	-1.321
710	51-4021	Extruding and Drawing Machine Setters, Operators, and Tenders, Metal and Plastic	-1.325
711	51-7011	Cabinetmakers and Bench Carpenters	-1.327
712	47-2082	Tapers	-1.345
713	53-7021	Crane and Tower Operators	-1.352
714	45-4022	Logging Equipment Operators	-1.355
715	47-5041	Continuous Mining Machine Operators	-1.355
716	51-9198	Helpers--Production Workers	-1.355
717	51-9199	Production Workers, All Other	-1.363
718	53-7032	Excavating and Loading Machine and Dragline Operators	-1.364
719	47-3012	Helpers--Carpenters	-1.370
720	45-3021	Hunters and Trappers	-1.374
721	47-2141	Painters, Construction and Maintenance	-1.381
722	53-7033	Loading Machine Operators, Underground Mining	-1.390
723	47-5011	Derrick Operators, Oil and Gas	-1.391
724	53-3032	Heavy and Tractor-Trailer Truck Drivers	-1.400
725	53-7121	Tank Car, Truck, and Ship Loaders	-1.403
726	47-2061	Construction Laborers	-1.405

727	51-6093	Upholsterers	-1.405
728	47-2041	Carpet Installers	-1.414
729	51-6064	Textile Winding, Twisting, and Drawing Out Machine Setters, Operators, and Tenders	-1.417
730	49-3093	Tire Repairers and Changers	-1.423
731	45-2092	Farmworkers and Laborers, Crop, Nursery, and Greenhouse	-1.432
732	35-9011	Dining Room and Cafeteria Attendants and Bartender Helpers	-1.433
733	49-9095	Manufactured Building and Mobile Home Installers	-1.440
734	47-3013	Helpers--Electricians	-1.445
735	47-2072	Pile-Driver Operators	-1.455
736	47-3015	Helpers--Pipelayers, Plumbers, Pipefitters, and Steamfitters	-1.462
737	51-9197	Tire Builders	-1.463
738	49-9093	Fabric Menders, Except Garment	-1.464
739	47-2022	Stonemasons	-1.483
740	49-3043	Rail Car Repairers	-1.485
741	47-2081	Drywall and Ceiling Tile Installers	-1.496
742	47-4061	Rail-Track Laying and Maintenance Equipment Operators	-1.497
743	53-7111	Mine Shuttle Car Operators	-1.497
744	53-7062	Laborers and Freight, Stock, and Material Movers, Hand	-1.498
745	47-5071	Roustabouts, Oil and Gas	-1.500
746	47-2131	Insulation Workers, Floor, Ceiling, and Wall	-1.510
747	45-3011	Fishers and Related Fishing Workers	-1.511
748	53-7061	Cleaners of Vehicles and Equipment	-1.535
749	51-3023	Slaughterers and Meat Packers	-1.543
750	47-2181	Roofers	-1.553
751	35-9021	Dishwashers	-1.561
752	47-2142	Paperhangers	-1.566
753	51-9122	Painters, Transportation Equipment	-1.568
754	47-5081	Helpers--Extraction Workers	-1.572
755	47-2043	Floor Sanders and Finishers	-1.574
756	53-7051	Industrial Truck and Tractor Operators	-1.575
757	47-2161	Plasterers and Stucco Masons	-1.578
758	37-3013	Tree Trimmers and Pruners	-1.581
759	47-5061	Roof Bolters, Mining	-1.593

760	47-2021	Brickmasons and Blockmasons	-1.607
761	47-5051	Rock Splitters, Quarry	-1.614
762	51-4071	Foundry Mold and Coremakers	-1.642
763	37-3011	Landscaping and Groundskeeping Workers	-1.656
764	47-3016	Helpers--Roofers	-1.668
765	47-4031	Fence Erectors	-1.675
766	47-2051	Cement Masons and Concrete Finishers	-1.678
767	47-2053	Terrazzo Workers and Finishers	-1.685
768	47-2221	Structural Iron and Steel Workers	-1.701
769	47-3014	Helpers--Painters, Paperhangers, Plasterers, and Stucco Masons	-1.711
770	47-2171	Reinforcing Iron and Rebar Workers	-1.781
771	45-4021	Fallers	-1.791
772	27-2031	Dancers	-1.793
773	47-3011	Helpers--Brickmasons, Blockmasons, Stonemasons, and Tile and Marble Setters	-1.822
774	51-6021	Pressers, Textile, Garment, and Related Materials	-1.854

## APPENDIX 3

### FULL LIST OF OCCUPATIONS SORTED BY IMAGE GENERATION EXPOSURE SCORE

Rank	SOC Code	Occupation Title	Image Generation AIOE
1	27-1025	Interior Designers	2.421
2	17-1011	Architects, Except Landscape and Naval	2.389
3	17-2041	Chemical Engineers	2.256
4	27-1011	Art Directors	2.249
5	19-2011	Astronomers	2.128
6	17-3013	Mechanical Drafters	1.986
7	17-2151	Mining and Geological Engineers, Including Mining Safety Engineers	1.985
8	17-2051	Civil Engineers	1.977
9	27-1021	Commercial and Industrial Designers	1.973
10	27-4032	Film and Video Editors	1.970
11	27-1024	Graphic Designers	1.917
12	15-2021	Mathematicians	1.905
13	19-3099	Social Scientists and Related Workers, All Other	1.903
14	17-3011	Architectural and Civil Drafters	1.902
15	53-2021	Air Traffic Controllers	1.893
16	17-2081	Environmental Engineers	1.890
17	11-9021	Construction Managers	1.857
18	27-1014	Multimedia Artists and Animators	1.845
19	43-9031	Desktop Publishers	1.839
20	43-9111	Statistical Assistants	1.791
21	19-2012	Physicists	1.791
22	17-1012	Landscape Architects	1.780
23	15-1132	Software Developers, Applications	1.776
24	15-1134	Web Developers	1.765
25	15-1141	Database Administrators	1.730

26	17-2011	Aerospace Engineers	1.711
27	17-1021	Cartographers and Photogrammetrists	1.699
28	17-3022	Civil Engineering Technicians	1.676
29	15-1131	Computer Programmers	1.673
30	19-1041	Epidemiologists	1.653
31	17-2031	Biomedical Engineers	1.652
32	19-3051	Urban and Regional Planners	1.642
33	15-2011	Actuaries	1.637
34	15-1111	Computer and Information Research Scientists	1.630
35	17-2141	Mechanical Engineers	1.628
36	11-2011	Advertising and Promotions Managers	1.615
37	11-2021	Marketing Managers	1.610
38	15-1122	Information Security Analysts	1.609
39	15-1199	Computer Occupations, All Other	1.596
40	19-2032	Materials Scientists	1.593
41	19-2099	Physical Scientists, All Other	1.584
42	17-2131	Materials Engineers	1.578
43	17-2171	Petroleum Engineers	1.576
44	17-2111	Health and Safety Engineers, Except Mining Safety Engineers and Inspectors	1.575
45	13-2011	Accountants and Auditors	1.572
46	13-1081	Logisticians	1.569
47	17-2061	Computer Hardware Engineers	1.560
48	17-3012	Electrical and Electronics Drafters	1.559
49	17-2161	Nuclear Engineers	1.557
50	51-5111	Prepress Technicians and Workers	1.556
51	15-2031	Operations Research Analysts	1.535
52	15-1121	Computer Systems Analysts	1.514
53	17-2071	Electrical Engineers	1.510
54	19-3092	Geographers	1.497
55	17-2112	Industrial Engineers	1.485
56	13-1051	Cost Estimators	1.478

57	15-1142	Network and Computer Systems Administrators	1.476
58	13-2061	Financial Examiners	1.453
59	17-2021	Agricultural Engineers	1.422
60	11-9161	Emergency Management Directors	1.404
61	15-1133	Software Developers, Systems Software	1.398
62	13-1161	Market Research Analysts and Marketing Specialists	1.396
63	19-2021	Atmospheric and Space Scientists	1.362
64	29-9092	Genetic Counselors	1.347
65	41-9031	Sales Engineers	1.335
66	15-2041	Statisticians	1.335
67	11-3031	Financial Managers	1.331
68	19-1042	Medical Scientists, Except Epidemiologists	1.327
69	13-2031	Budget Analysts	1.326
70	11-9041	Architectural and Engineering Managers	1.326
71	25-1031	Architecture Teachers, Postsecondary	1.323
72	11-9121	Natural Sciences Managers	1.313
73	11-1011	Chief Executives	1.310
74	27-1022	Fashion Designers	1.301
75	19-3011	Economists	1.299
76	11-3061	Purchasing Managers	1.298
77	19-3039	Psychologists, All Other	1.297
78	25-4012	Curators	1.287
79	19-3022	Survey Researchers	1.287
80	13-1031	Claims Adjusters, Examiners, and Investigators	1.286
81	19-1029	Biological Scientists, All Other	1.285
82	25-9031	Instructional Coordinators	1.276
83	11-3021	Computer and Information Systems Managers	1.275
84	41-1012	First-Line Supervisors of Non-Retail Sales Workers	1.270
85	19-4061	Social Science Research Assistants	1.262
86	19-3032	Industrial-Organizational Psychologists	1.257
87	27-3042	Technical Writers	1.244
88	43-5011	Cargo and Freight Agents	1.238
89	49-9061	Camera and Photographic Equipment Repairers	1.232

90	27-3041	Editors	1.229
91	19-2041	Environmental Scientists and Specialists, Including Health	1.229
92	13-2053	Insurance Underwriters	1.229
93	29-9011	Occupational Health and Safety Specialists	1.226
94	13-1141	Compensation, Benefits, and Job Analysis Specialists	1.221
95	13-1199	Business Operations Specialists, All Other	1.221
96	13-2099	Financial Specialists, All Other	1.221
97	19-1022	Microbiologists	1.220
98	17-2199	Engineers, All Other	1.213
99	51-8011	Nuclear Power Reactor Operators	1.211
100	19-1021	Biochemists and Biophysicists	1.209
101	27-2012	Producers and Directors	1.206
102	11-3131	Training and Development Managers	1.200
103	17-3026	Industrial Engineering Technicians	1.199
104	17-2121	Marine Engineers and Naval Architects	1.186
105	13-2021	Appraisers and Assessors of Real Estate	1.185
106	29-1031	Dietitians and Nutritionists	1.184
107	13-2041	Credit Analysts	1.176
108	27-3043	Writers and Authors	1.170
109	13-2051	Financial Analysts	1.164
110	25-1032	Engineering Teachers, Postsecondary	1.163
111	41-9022	Real Estate Sales Agents	1.148
112	25-9011	Audio-Visual and Multimedia Collections Specialists	1.146
113	43-9011	Computer Operators	1.144
114	41-3011	Advertising Sales Agents	1.130
115	19-1012	Food Scientists and Technologists	1.129
116	19-1011	Animal Scientists	1.120
117	11-2031	Public Relations and Fundraising Managers	1.120
118	33-9031	Gaming Surveillance Officers and Gaming Investigators	1.111
119	53-2022	Airfield Operations Specialists	1.110
120	11-9033	Education Administrators, Postsecondary	1.110
121	17-2072	Electronics Engineers, Except Computer	1.105

122	43-5032	Dispatchers, Except Police, Fire, and Ambulance	1.069
123	29-1041	Optometrists	1.061
124	13-1023	Purchasing Agents, Except Wholesale, Retail, and Farm Products	1.058
125	19-2042	Geoscientists, Except Hydrologists and Geographers	1.057
126	11-9141	Property, Real Estate, and Community Association Managers	1.054
127	51-9081	Dental Laboratory Technicians	1.043
128	25-4021	Librarians	1.043
129	13-2081	Tax Examiners and Collectors, and Revenue Agents	1.043
130	13-2082	Tax Preparers	1.040
131	23-1011	Lawyers	1.036
132	51-9071	Jewelers and Precious Stone and Metal Workers	1.035
